The Society for Simulation in Healthcare (SSH) seeks to improve performance and reduce errors in patient care through the use of simulation. Established in 2004 by professionals using simulation for education, testing, and research in health care, SSH membership includes nearly 3,400 physicians, nurses, allied health and paramedical personnel, researchers, educators and developers from around the globe. SSH fosters the improvement and application of simulation–based modalities such as human patient simulators, virtual reality, standardized patients and task trainers.
