SUMMARY & PURPOSE:
This policy shall describe the key components and processes that are to be followed for any appeal that occurs.

DEFINITIONS:
Appellant: the individual filing the appeal. The individual must file their own appeal and can be at any stage of the certification process (applicant, candidate, certificant).

POLICY:
Individuals at any stage of the certification process shall be allowed to file an appeal following the process as described in this policy. An appeal will be considered in the following circumstances where the individual does not achieve or maintain certification:

- determination of ineligibility for certification.
- adverse testing conditions severe enough to cause a major disruption of the examination process.
- revocation decision (e.g. ethical or legal misconduct).
- determination of ineligibility for renewal or recertification.
- determination of non-renewal.
- other outcomes from a disciplinary action impacting the Appellant

Submitted appeals shall not be considered for the following:

- review of individual examination items
- review of examination forms

The Certificant shall state the specific grounds why the appeal should be considered or granted. The Certificant’s appeal may not present, include, or rely on facts that were not previously presented in the proceedings that led to the decision being appealed. Appeals are limited to:

- The fact that the Council’s decision was not supported by or was contradicted by the evidence presented;
- The fact that the Council did not follow its own Policies, Rules and Procedures; and/or
- That the disciplinary action is not appropriate to the gravity of the situation.

Certification Status during the Appeals Process

- During the period that appeals considerations are in progress, appellants will be continued based on the individual’s standing with the certification program, subject to the normal and regular cycle of renewal requirements.
