SSH SimSeries: SimOps:
Eureka! Securing a Patent for Your Invention

Faculty
Matthew Kosemund, TSMT, Veteran

Content Category
Educational Technologies

Delivery Format
Panel Session - 40 minute Presentation, 20 minute Discussion

Key Topic
Innovation

Content Degree
This course is a general overview of the topic.

Overview
This course will cover a basic education about prototyping and US patent processes, and the measures one needs to take to protect intellectual properties.

Objective 1
Discuss the importance of prototyping: Having a strong enough design plan to build a prototype shows investors that your concept is achievable.

Objective 2
Explain the US patent process: What are the steps to applying for a provisional and full patent.

Objective 3
Outline the measure you should take to protect your invention until the patent process is complete. How secretive do you need to be?
