SSH SimSeries: SimOps: Improve Program Management: Grow Without the Pains

Faculty:
Jarrod Young, MBA, CHSOS; Chad Epps, MD, CHSE; Jamie Pitt, MHPE; Teresa Britt, MSN, CHSE

Course Description:
Juggling simulation space, staff, and resources can be a headache. We will walk you through our process for scheduling, managing, and maintaining our new 45,000 square foot health science simulation center, which serves five colleges, multiple residency programs, and three local hospital systems. Gain insight from our journey to provide equal access to all programs on campus through creation of policies and procedures and an introduction to the tools that we identified for successful implementation and communication.

Learning Objectives:
- Discuss how policies and procedures impact a simulation program's event management process
- Identify strategies for workflow efficiencies in simulation programs
- Identify tools and resources to assist in the management of your simulation program
