Preconference Courses
July 17, 2019
$295 1PM – 5 PM

**Diagnose and Repair Your Manikin: The Sim Show Must Go On!**
This course addresses maintenance and repairs for adult, pediatric, and infant manikins through a hands-on immersive experience. Simulation centers can be negatively impacted when manikins fail to operate optimally. Users need the training to perform appropriate maintenance and repairs on their manikins. Maintaining sim operations requires becoming more knowledgeable and confident removing.

**Simple Strategies to Standardize Moulage Creation**
Moulage elevates a simulation experience, providing increased realism for learners. This course presents instruction on basic moulage supplies, concepts, and techniques for all budgets. Course participants will make their own wounds using an assortment of silicone, make-up, and tattoos in this interactive workshop. Moulage creations including burns, lacerations, rashes, and bruises will be demonstrated.

**Tactical Combat Casualty Care**
This course will provide novice and experienced simulationists with the knowledge and skills to construct and execute a TCCC course. The TCCC course is the military counterpart to the Prehospital Trauma Life Support Course. It is designed for military medics, corpsmen, and pararescuemen who are preparing to deploy in support of combat operations. Participants will be able to apply concepts and best practices at their home institution for planning and executing complex, immersive simulation activities.

**Implement AR/VR Learning Strategies into Your Simulation Program**
The SimOps Planning Committee is working on created an AR/VR preconference course based on the AR/VR Needs Assessment from SOTS. More details to follow.
